

MOBIWISE GRADING CRITERIA

Verizon Unlocked Device Grading

Devices are not functionally tested. Grading reflects cosmetic condition only. Devices across all grades (A–D) may contain functional defects — functional components are not verified prior to sale. Cosmetic grade is not an indicator of working condition.

Photos are the actual reference images supplied for each grade; Images are illustrative of representative units and do not depict every possible cosmetic variation within a grade.

Grade A: Minimal scratches and blemishes may be present on screen and housing. May have a few cosmetic marks on the housing. External Liquid Damage Indicator may be missing but must not indicate liquid exposure. LCD may contain shadows or burn-in since the device is not functionally tested.

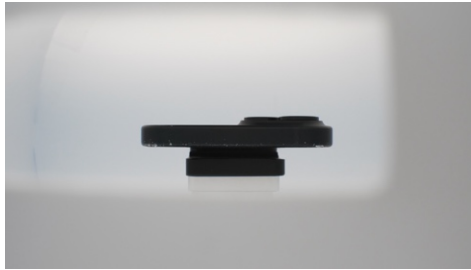

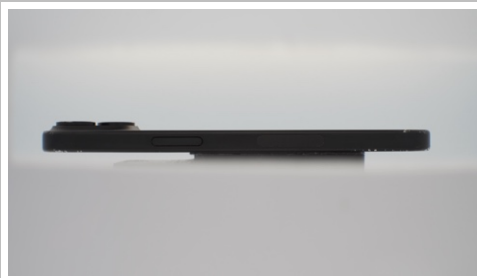

Grade B: Light overall cosmetic wear with one or multiple light scratches varying in length. Moderate scratches on screen. No LCD or touch panel cracks; light burn marks are acceptable. Camera lens cracks may be present. External Liquid Damage Indicator may be missing but must not indicate liquid exposure. LCD may contain shadows or burn-in since the device is not functionally tested.

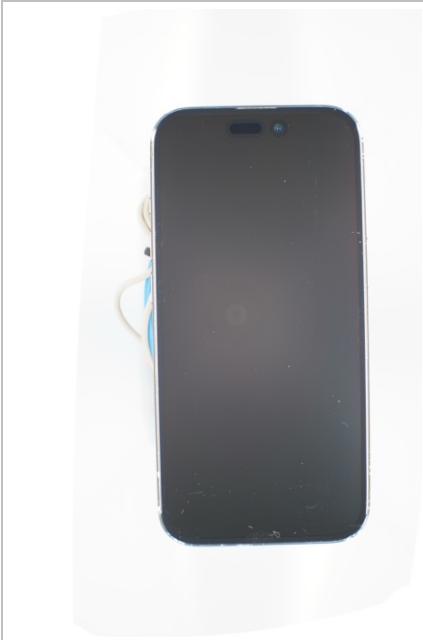

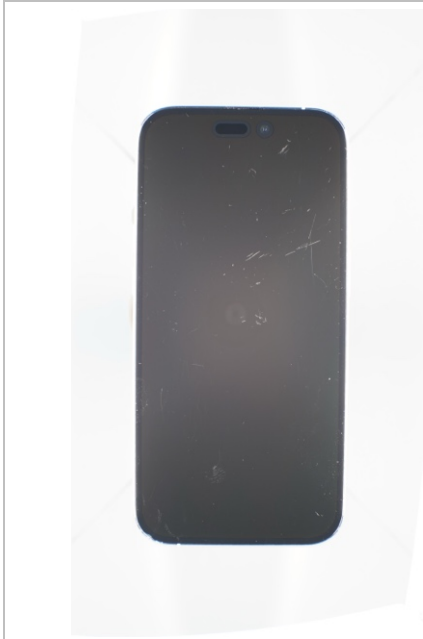

Grade C: Moderate to heavy cosmetic wear with multiple visible scratches, blemishes, burns, or dents. Deep scratches may be present on the LCD, touch panel, back housing, or back glass. Camera lens cracks may be present. External Liquid Damage Indicator may be missing but must not indicate liquid exposure. LCD may contain shadows or burn-in since the device is not functionally tested.

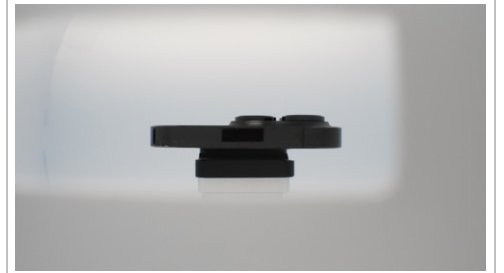

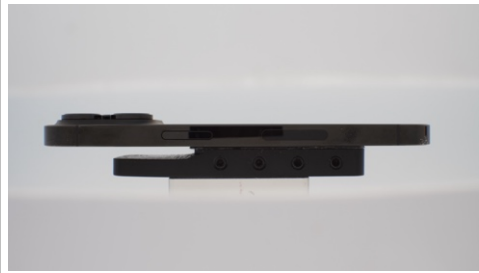

Grade D: Heavy cosmetic damage with extensive scratches, dents, and cracks. Cracks may be present on the front glass, mid frame, and/or back glass. LCD may contain shadows or burn-in since the device is not functionally tested.
